|-----------------|--|--|
| Research Topic  | Evaluation of preconceptions using environmental images from abroad. | Graduate School of Engineering                   |
| Host University | Vienna University of Technology / Vienna / Austria                   | Architecture, Civil Engineering and Urban Design |
| Duration        | From October 20 to January 31, 2022                                  | Shotaro OHTSUJI                                  |

## Summary of the Research Activities

*I worked with a professor from the Vienna University of Technology to learn about the differences between Japanese and foreign perceptions of external space.*

*While walking the streets of Vienna with the professor, we discussed in depth the history and origins of the Viennese urban structure and how it differs from the Japanese urban structure, giving them a valuable opportunity to directly experience different cultures abroad. In addition, together with the professor, environmental images were filmed using a 360° camera at unique locations abroad, such as the main square in Vienna and the Japanese garden in Schönbrunn Palace. I plan to use this for my research in Japan.*

## College Life,

*TUwien has a very good location and transport links. The staff and fellow students at TUwien are very friendly and helpful in helping me with things outside the school.*

## 指導教員講評

音楽の都で人々が建築や都市空間無の中で音を創り出す意味を実感し、自分を見つけるような経験が出来たようです。

指導教員氏名：田中 一成
